Missoula, MT 59802

Dear Greg:

I want to express my satisfaction with the home you built for us in Missoula. The craftsmanship is outstanding, and our home is as beautiful as I had hoped.

I highly recommend Sirius Construction for custom homes with special features and for owners who want outstanding attention to detail. Our home had numerous unusual features, and Sirius was innovative in designing beautiful yet practical solutions to special problems. The workmanship was outstanding. I am very particular about details, and Sirius met my expectations. You never hesitated to do what was asked during the long construction.

You designed a way to accommodate unusual German windows with large shutter boxes by using beautiful valances, which enhance the appearance of the windows. The valances are easily removed for access to the shutter motors. The woodwork was done with the care and precision of furniture. We even had Sirius make a bench from a tree that had stood where the house was built.

I found everyone at Sirius to be friendly and easy to work with. I plan use Sirius for some anticipated future work on the house.

Regards,

Walt Maclay
