To Whom It May Concern:

It is with pleasure that I write this letter of recommendation for Sirius Construction, Inc.

In April 2013, Sirius Construction was awarded the bid for a renovation of the medical and dental clinics at Curry Health Center at the University of Montana. This renovation included the complete demolition and renovation of the dental clinic and significant demolition and renovation of the medical clinic. The major challenge with this renovation was that it needed to be completed while the departments remained operational.

While the timeline for this project was very aggressive, through cooperative planning with the architect and building management, Sirius Construction was able to develop and implement thoughtful and appropriate phasing plans to accomplish the task. I found Sirius Construction to be very responsive to addressing construction challenges that presented themselves (i.e., excessive noise, adjusting work schedules, evening and weekend work, etc.) as the project moved forward. In October 2013 we moved into the new dental clinic and in January 2014 the medical clinic will be completed.

I found Sirius Construction representatives and subcontractors to be professional and courteous and very responsive to our needs.

Sincerely,

Rick Curtis

Director, Curry Health Center
