To Whom it May Concern:

I recommend Sirius Construction with full confidence based on their performance as our General Contractor on our 4800 sq. ft. pediatric dental practice. The project timeline was Dec. '17 to July '18 and was completed on time, on budget, and the quality and attention to detail met our expectations. The whole team at Sirius Construction communicated clearly, honestly, and they were always proactive in preparing us as the owners for upcoming decisions and action items. Building a space that supports your livelihood can be stressful, but thankfully the relationship we developed with Sirius as a General Contractor made the process smooth and left us confident that we were going to be happy with the final product. Most importantly, we are absolutely pleased with the final product.

Regards,

Ian Foster
